

Factors of change I: demand-side explanations

Session 10

Álvaro Canalejo-Molero

University of Lucerne

Spring Term 2021-2022

- ① Explaining party system change: demand vs. supply factors
- ② Factors of change I: demand-side explanations
- ③ The changing role of class: “Explaining Workers’ Support for Right-Wing Populist Parties in Western Europe” (Oesch, 2008)
- ④ More recent findings
- ⑤ Additional readings
- ⑥ References

Explaining party system change: demand vs. supply factors

Explaining party system change: demand vs. supply factors

- So far, we have studied party-systems from a holistic perspective:

Explaining party system change: demand vs. supply factors

- So far, we have studied party-systems from a holistic perspective:
 - Comparatively (e.g., differences between SE and NWE)

Explaining party system change: demand vs. supply factors

- So far, we have studied party-systems from a holistic perspective:
 - Comparatively (e.g., differences between SE and NWE)
 - Historically (e.g., from 1920s to the 1960s)

Explaining party system change: demand vs. supply factors

- So far, we have studied party-systems from a holistic perspective:
 - Comparatively (e.g., differences between SE and NWE)
 - Historically (e.g., from 1920s to the 1960s)
 - Focusing either on general trends (e.g., Green and Far Right parties)

Explaining party system change: demand vs. supply factors

- So far, we have studied party-systems from a holistic perspective:
 - Comparatively (e.g., differences between SE and NWE)
 - Historically (e.g., from 1920s to the 1960s)
 - Focusing either on general trends (e.g., Green and Far Right parties)
 - Or on strong specific shocks (e.g., Tangetopoli)

Explaining party system change: demand vs. supply factors

- So far, we have studied party-systems from a holistic perspective:
 - Comparatively (e.g., differences between SE and NWE)
 - Historically (e.g., from 1920s to the 1960s)
 - Focusing either on general trends (e.g., Green and Far Right parties)
 - Or on strong specific shocks (e.g., Tangetopoli)
 - We have reviewed some theories of party-system change and continuity (e.g., the freezing hypothesis)

Explaining party system change: demand vs. supply factors

- So far, we have studied party-systems from a holistic perspective:
 - Comparatively (e.g., differences between SE and NWE)
 - Historically (e.g., from 1920s to the 1960s)
 - Focusing either on general trends (e.g., Green and Far Right parties)
 - Or on strong specific shocks (e.g., Tangetopoli)
 - We have reviewed some theories of party-system change and continuity (e.g., the freezing hypothesis)
 - Or try to adequate empirical patterns to the existent theories (e.g., cleavage theory)

Explaining party system change: demand vs. supply factors

- But what happens if we want to decompose these over-arching explanations and focus in more specific phenomena?

Explaining party system change: demand vs. supply factors

- But what happens if we want to decompound these over-arching explanations and focus in more specific phenomena?
- From analyses at the **aggregate**-level (country, party-system or election level) to analyses at the **party and voter** (i.e., individual) levels

Explaining party system change: demand vs. supply factors

- One way to do this analysis is to distinguish between **supply** and **demand** side explanations

Explaining party system change: demand vs. supply factors

- One way to do this analysis is to distinguish between **supply** and **demand** side explanations
- The supply side (tomorrow):

Explaining party system change: demand vs. supply factors

- One way to do this analysis is to distinguish between **supply** and **demand** side explanations
- The supply side (tomorrow):
 - Level of analysis: parties

Explaining party system change: demand vs. supply factors

- One way to do this analysis is to distinguish between **supply** and **demand** side explanations
- The supply side (tomorrow):
 - Level of analysis: parties
 - Question: how do new parties get votes?

Explaining party system change: demand vs. supply factors

- One way to do this analysis is to distinguish between **supply** and **demand** side explanations
- The supply side (tomorrow):
 - Level of analysis: parties
 - Question: how do new parties get votes?
- The demand side (today):

Explaining party system change: demand vs. supply factors

- One way to do this analysis is to distinguish between **supply** and **demand** side explanations
- The supply side (tomorrow):
 - Level of analysis: parties
 - Question: how do new parties get votes?
- The demand side (today):
 - Level of analysis: individuals/voters

Explaining party system change: demand vs. supply factors

- One way to do this analysis is to distinguish between **supply** and **demand** side explanations
- The supply side (tomorrow):
 - Level of analysis: parties
 - Question: how do new parties get votes?
- The demand side (today):
 - Level of analysis: individuals/voters
 - Question: who votes for new parties and why?

Factors of change I: demand-side explanations

Factors of change I: demand-side explanations

- Shifting from the analysis of countries, party-systems and elections to **voters** (not only: meso-level units of observations too [e.g., regions or municipalities])

Factors of change I: demand-side explanations

- Shifting from the analysis of countries, party-systems and elections to **voters** (not only: meso-level units of observations too [e.g., regions or municipalities])
- **What demand-side factors may explain voters shifting to new/challenger parties?** (think on implications of the theories we have reviewed!)

Factors of change I: demand-side explanations

- Shifting from the analysis of countries, party-systems and elections to **voters** (not only: meso-level units of observations too [e.g., regions or municipalities])
- **What demand-side factors may explain voters shifting to new/challenger parties?** (think on implications of the theories we have reviewed!)
 - Age

**The changing role of class: “Explaining
Workers’ Support for Right-Wing Populist
Parties in Western Europe” (Oesch, 2008)**

The puzzle and research question

- The **puzzle**:

The puzzle and research question

- The **puzzle**:
 - A emerging new kind of far right ([Ignazi, 1992](#))

The puzzle and research question

- The **puzzle**:
 - A emerging new kind of far right ([Ignazi, 1992](#))
 - Austrian Freedom Party, Belgian Flemish Block, French National Front, Danish People's Party, Norwegian Progress Party

The puzzle and research question

- The **puzzle**:
 - A emerging new kind of far right ([Ignazi, 1992](#))
 - Austrian Freedom Party, Belgian Flemish Block, French National Front, Danish People's Party, Norwegian Progress Party
 - Italian Lega Nord, Swiss People's Party

The puzzle and research question

- The **puzzle**:
 - A emerging new kind of far right ([Ignazi, 1992](#))
 - Austrian Freedom Party, Belgian Flemish Block, French National Front, Danish People's Party, Norwegian Progress Party
 - Italian Lega Nord, Swiss People's Party
 - **New type of working-class party?**

The puzzle and research question

- The **puzzle**:
 - A emerging new kind of far right ([Ignazi, 1992](#))
 - Austrian Freedom Party, Belgian Flemish Block, French National Front, Danish People's Party, Norwegian Progress Party
 - Italian Lega Nord, Swiss People's Party
 - **New type of working-class party?**
 - **Class cleavage traditionally explained vote for left/right parties:**
the sociological premise is that **low-income voters should support parties that proposes a stronger intervention of the state on the economy to minimize risk exposure**

The puzzle and research question

- The **puzzle**:
 - A emerging new kind of far right (Ignazi, 1992)
 - Austrian Freedom Party, Belgian Flemish Block, French National Front, Danish People's Party, Norwegian Progress Party
 - Italian Lega Nord, Swiss People's Party
 - **New type of working-class party?**
 - **Class cleavage traditionally explained vote for left/right parties:** the sociological premise is that **low-income voters should support parties that proposes a stronger intervention of the state on the economy to minimize risk exposure**
- Therefore, ***Research Question***: **why workers are more likely than any other class (with exceptions) to vote for RPPs?**

Hypotheses

- Emerging theses to explain **why workers would shift from socialist and communist parties:**
 - H1. Economic anxieties
 - H2. Cultural threat
 - H3. Social alienation/political dissatisfaction

Hypotheses

H1. Economic anxieties

- Anti-immigration attitudes gained “center stage”

Hypotheses

H1. Economic anxieties

- Anti-immigration attitudes gained “center stage”
- Two possible motives:

Hypotheses

H1. Economic anxieties

- Anti-immigration attitudes gained “center stage”
- Two possible motives:
 - Economic reasons (fear of pressure on wages and welfare benefits)

Hypotheses

H1. Economic anxieties

- Anti-immigration attitudes gained “center stage”
- Two possible motives:
 - Economic reasons (fear of pressure on wages and welfare benefits)
 - Cultural reasons (unease about multiculturalism and the granting of citizens rights to foreigners)

Hypotheses

H1. Economic anxieties

- Anti-immigration attitudes gained “center stage”
- Two possible motives:
 - Economic reasons (fear of pressure on wages and welfare benefits)
 - Cultural reasons (unease about multiculturalism and the granting of citizens rights to foreigners)
- **Economic reasons**

Hypotheses

H1. Economic anxieties

- Anti-immigration attitudes gained “center stage”
- Two possible motives:
 - Economic reasons (fear of pressure on wages and welfare benefits)
 - Cultural reasons (unease about multiculturalism and the granting of citizens rights to foreigners)
- **Economic reasons**
- “RPPs are in this sense defenders of the principle of”national preference” regarding employment and social security” (Andrea's response paper)

Hypotheses

H1. Economic anxieties

- Anti-immigration attitudes gained “center stage”
- Two possible motives:
 - Economic reasons (fear of pressure on wages and welfare benefits)
 - Cultural reasons (unease about multiculturalism and the granting of citizens rights to foreigners)
- **Economic reasons**
- “RPPs are in this sense defenders of the principle of” national preference” regarding employment and social security” (Andrea’s response paper)
- “RPPs may be favoured by those who believe that immigrants lower wages and exploit the welfare state” (Andrea’s response paper)

Hypotheses

H1. Economic anxieties

- **Economic reasons**

Hypotheses

H1. Economic anxieties

- **Economic reasons**
 - “Modernization losers” (lack of convertible skills)

Hypotheses

H1. Economic anxieties

- **Economic reasons**

- “Modernization losers” (lack of convertible skills)
- Two hypotheses:

Hypotheses

H1. Economic anxieties

- **Economic reasons**

- “Modernization losers” (lack of convertible skills)
- Two hypotheses:
 - Vote for RPPs as a response to perceived competition from immigrants for jobs, wages, social benefits, etc. (*economic protectionism hypothesis*)

Hypotheses

H1. Economic anxieties

- **Economic reasons**

- “Modernization losers” (lack of convertible skills)
- Two hypotheses:
 - Vote for RPPs as a response to perceived competition from immigrants for jobs, wages, social benefits, etc. (*economic protectionism hypothesis*)
 - Vote for RPPs because of the opinion that social benefits should be restricted to nationals (*welfare competition hypothesis*)

Hypotheses

H1. Economic anxieties

- **Economic reasons**

- “Modernization losers” (lack of convertible skills)
- Two hypotheses:
 - Vote for RPPs as a response to perceived competition from immigrants for jobs, wages, social benefits, etc. (*economic protectionism hypothesis*)
 - Vote for RPPs because of the opinion that social benefits should be restricted to nationals (*welfare competition hypothesis*)
- **QUESTION:** how is the second hypothesis different from the first one?

Hypotheses

H2. Cultural threat

- Questions of community and identity instead of distributional conflicts

Hypotheses

H2. Cultural threat

- Questions of community and identity instead of distributional conflicts
- “The emergence of RPPs thus represents the authoritarian response to the dominance of libertarian values and multicultural models of living” (p. 352)

Hypotheses

H2. Cultural threat

- Questions of community and identity instead of distributional conflicts
- “The emergence of RPPs thus represents the authoritarian response to the dominance of libertarian values and multicultural models of living” (p. 352)
- “Individuals in less privileged class locations are expected to be more receptive to the concept of “national preference” and an exclusionary notion of citizenship” (p. 352)

Hypotheses

H2. Cultural threat

- Questions of community and identity instead of distributional conflicts
- “The emergence of RPPs thus represents the authoritarian response to the dominance of libertarian values and multicultural models of living” (p. 352)
- “Individuals in less privileged class locations are expected to be more receptive to the concept of “national preference” and an exclusionary notion of citizenship” (p. 352)
 - Two hypotheses:

Hypotheses

H2. Cultural threat

- Questions of community and identity instead of distributional conflicts
- “The emergence of RPPs thus represents the authoritarian response to the dominance of libertarian values and multicultural models of living” (p. 352)
- “Individuals in less privileged class locations are expected to be more receptive to the concept of “national preference” and an exclusionary notion of citizenship” (p. 352)
 - Two hypotheses:
 - Vote for RPPs because of fear that a country’s culture is undermined by immigrants (*cultural protectionism hypothesis*)

Hypotheses

H2. Cultural threat

- Questions of community and identity instead of distributional conflicts
- “The emergence of RPPs thus represents the authoritarian response to the dominance of libertarian values and multicultural models of living” (p. 352)
- “Individuals in less privileged class locations are expected to be more receptive to the concept of “national preference” and an exclusionary notion of citizenship” (p. 352)
 - Two hypotheses:
 - Vote for RPPs because of fear that a country's culture is undermined by immigrants (*cultural protectionism hypothesis*)
 - Vote for RPPs because of an exclusive definition of citizenship (*differential nativism hypothesis*)

Hypotheses

H2. Cultural threat

- Questions of community and identity instead of distributional conflicts
- “The emergence of RPPs thus represents the authoritarian response to the dominance of libertarian values and multicultural models of living” (p. 352)
- “Individuals in less privileged class locations are expected to be more receptive to the concept of “national preference” and an exclusionary notion of citizenship” (p. 352)
 - Two hypotheses:
 - Vote for RPPs because of fear that a country’s culture is undermined by immigrants (*cultural protectionism hypothesis*)
 - Vote for RPPs because of an exclusive definition of citizenship (*differential nativism hypothesis*)
- **QUESTION:** why should workers be more likely to hold this kind of opinions?

Hypotheses

H3. Social alienation/political dissatisfaction

- Protest voting as a cornerstone explanation (RPPs as protest parties)

Hypotheses

H3. Social alienation/political dissatisfaction

- Protest voting as a cornerstone explanation (RPPs as protest parties)
- “Confronted with mass unemployment and stagnating real income, workers are expected to be particularly prone to nurture resentment against the political establishment” (p. 353)

Hypotheses

H3. Social alienation/political dissatisfaction

- Protest voting as a cornerstone explanation (RPPs as protest parties)
- “Confronted with mass unemployment and stagnating real income, workers are expected to be particularly prone to nurture resentment against the political establishment” (p. 353)
- Social anomie as an alternative explanation: “these disenchanted and alienated voters express their deep disenchantment with contemporary politics due to their weakening of traditional loyalty.” (Andrea’s response paper)

Hypotheses

H3. Social alienation/political dissatisfaction

- Protest voting as a cornerstone explanation (RPPs as protest parties)
- “Confronted with mass unemployment and stagnating real income, workers are expected to be particularly prone to nurture resentment against the political establishment” (p. 353)
- Social anomie as an alternative explanation: “these disenchanted and alienated voters express their deep disenchantment with contemporary politics due to their weakening of traditional loyalty.” (Andrea’s response paper)
- Remember the fading party ties hypothesis!

Hypotheses

H3. Social alienation/political dissatisfaction

- Protest voting as a cornerstone explanation (RPPs as protest parties)
- “Confronted with mass unemployment and stagnating real income, workers are expected to be particularly prone to nurture resentment against the political establishment” (p. 353)
- Social anomie as an alternative explanation: “these disenchanted and alienated voters express their deep disenchantment with contemporary politics due to their weakening of traditional loyalty.” (Andrea’s response paper)
- Remember the fading party ties hypothesis!
 - Two hypotheses:

- Social anomie as an alternative explanation: “these disenchanted and alienated voters express their deep disenchantment with contemporary politics due to their weakening of traditional loyalty.” (Andrea’s response paper)
- Remember the fading party ties hypothesis!
 - Two hypotheses:
 - Vote for RPPs because of dissatisfaction with how democracy works (*protest voting hypothesis*)

Hypotheses

H3. Social alienation/political dissatisfaction

- Protest voting as a cornerstone explanation (RPPs as protest parties)
- “Confronted with mass unemployment and stagnating real income, workers are expected to be particularly prone to nurture resentment against the political establishment” (p. 353)
- Social anomie as an alternative explanation: “these disenchanted and alienated voters express their deep disenchantment with contemporary politics due to their weakening of traditional loyalty.” (Andrea’s response paper)
- Remember the fading party ties hypothesis!
 - Two hypotheses:
 - Vote for RPPs because of dissatisfaction with how democracy works (*protest voting hypothesis*)
 - Vote for RPPs when not integrated into intermediary networks (*social disorganization hypothesis*)

Hypotheses

H3. Social alienation/political dissatisfaction

- Protest voting as a cornerstone explanation (RPPs as protest parties)
- “Confronted with mass unemployment and stagnating real income, workers are expected to be particularly prone to nurture resentment against the political establishment” (p. 353)
- Social anomie as an alternative explanation: “these disenchanted and alienated voters express their deep disenchantment with contemporary politics due to their weakening of traditional loyalty.” (Andrea’s response paper)
- Remember the fading party ties hypothesis!
 - Two hypotheses:
 - Vote for RPPs because of dissatisfaction with how democracy works (*protest voting hypothesis*)
 - Vote for RPPs when not integrated into intermediary networks (*social disorganization hypothesis*)
- **QUESTION:** what do the author mean by intermediary networks?

Research design

- Five Western European countries: Austria, Belgium, France, Norway, and Switzerland

Research design

- Five Western European countries: Austria, Belgium, France, Norway, and Switzerland
- In all five countries there is a large right-wing populist party

Research design

- Five Western European countries: Austria, Belgium, France, Norway, and Switzerland
- In all five countries there is a large right-wing populist party
- “We considered only RPPs that obtained at least 5 percent of votes in parliamentary elections in or prior to 2002” (p. 354)

Research design

- Five Western European countries: Austria, Belgium, France, Norway, and Switzerland
- In all five countries there is a large right-wing populist party
- “We considered only RPPs that obtained at least 5 percent of votes in parliamentary elections in or prior to 2002” (p. 354)
- **QUESTION:** which are these parties in each country?

Research design

- Five Western European countries: Austria, Belgium, France, Norway, and Switzerland
- In all five countries there is a large right-wing populist party
- “We considered only RPPs that obtained at least 5 percent of votes in parliamentary elections in or prior to 2002” (p. 354)
- **QUESTION:** which are these parties in each country?
- **QUESTION:** what do you think of this case selection strategy?

Research design

- RPPs:

Research design

- RPPs:
 - ① a location at the extreme right on the ideological axis ranging from libertarian-universalistic to traditionalist-communitarian positions

Research design

- RPPs:
 - ① a location at the extreme right on the ideological axis ranging from libertarian-universalistic to traditionalist-communitarian positions
 - ② a populist anti-establishment discourse

Research design

- RPPs:
 - ① a location at the extreme right on the ideological axis ranging from libertarian-universalistic to traditionalist-communitarian positions
 - ② a populist anti-establishment discourse
 - ③ a hierarchical internal structure which sets them apart from pluralist parties

Research design

- RPPs:
 - ① a location at the extreme right on the ideological axis ranging from libertarian-universalistic to traditionalist-communitarian positions
 - ② a populist anti-establishment discourse
 - ③ a hierarchical internal structure which sets them apart from pluralist parties
- **QUESTION:** does this definition coincide with the Mudde's definition?

Data and models

- European Social Survey 02/03

Data and models

- European Social Survey 02/03
- “For the paper, written in 2008, these data may still be representative, even though one could also argue against it, but in 2022 a new analysis with more recent data is needed” (Miguel’s response paper)

Data and models

- European Social Survey 02/03
- “For the paper, written in 2008, these data may still be representative, even though one could also argue against it, but in 2022 a new analysis with more recent data is needed” (Miguel’s response paper)
- “In the last two decades different events have taken place, which could have had influenced how persons vote. With the refugee crisis in 2015 it would be interesting to view which impact that would have in the above mentioned categories” (Miguel’s response paper)

Data and models

- ESS underestimation of PRR voting (**why?**)

Data and models

- ESS underestimation of PRR voting (**why?**)
- DV: self-declared vote for a PRR party

Data and models

- ESS underestimation of PRR voting (**why?**)
- DV: self-declared vote for a PRR party
- IV: Sex, age, **class** + **one attitudinal variable for each hypothesis**

Data and models

- ESS underestimation of PRR voting (**why?**)
- DV: self-declared vote for a PRR party
- IV: Sex, age, **class** + **one attitudinal variable for each hypothesis**
- Expectation: remove the effect of the working class when introducing the attitudinal variables

Data and models

- ESS underestimation of PRR voting (**why?**)
- DV: self-declared vote for a PRR party
- IV: Sex, age, **class** + **one attitudinal variable for each hypothesis**
- Expectation: remove the effect of the working class when introducing the attitudinal variables
- **QUESTION:** what do you think of this empirical strategy?

Empirical evidence

- Proportion of RPP supporters by class and country

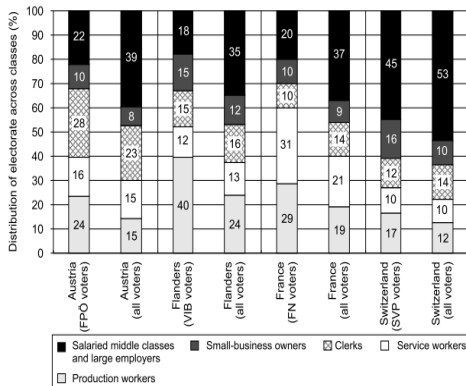

FIGURE 2. *Class Composition of the Right-Wing Populist Parties' Electorate*

Figure 1: Figure 2 in Oesch (2008)

Empirical evidence

- Proportion of RPP supporters by class and country (p. 356)

Empirical evidence

- Proportion of RPP supporters by class and country (p. 356)
 - ① “First, the thesis of a proletarianization of the right-wing populist parties’ electorate clearly seems correct for the five countries on which this study focuses”

Empirical evidence

- Proportion of RPP supporters by class and country (p. 356)
 - ① “First, the thesis of a proletarianization of the right-wing populist parties’ electorate clearly seems correct for the five countries on which this study focuses”
 - ② “Second, alongside the two little-privileged classes of production and service workers, a third category is over-represented among RPP followers, namely, small-business owners”

Empirical evidence

- Proportion of RPP supporters by class and country (p. 356)
 - ① “First, the thesis of a proletarianization of the right-wing populist parties’ electorate clearly seems correct for the five countries on which this study focuses”
 - ② “Second, alongside the two little-privileged classes of production and service workers, a third category is over-represented among RPP followers, namely, small-business owners”
 - ③ “Third, two categories show very little sympathy for RPPs in all five countries. This applies to the traditional bourgeoisie (comprising large employers and self-employed professionals) and, above all, sociocultural professionals and semi-professionals”

Empirical evidence

- Main conclusions from the multivariate analysis (p. 365):

Empirical evidence

- Main conclusions from the multivariate analysis (p. 365):
 - “A comprehensive statistical analysis involving the interpretation of different models explaining these determinants led to the conclusion that the most important factor influencing RPP voting is the fear that immigration undermines a nation's culture.” (Andrea's response paper)

Empirical evidence

- Main conclusions from the multivariate analysis (p. 365):
 - “A comprehensive statistical analysis involving the interpretation of different models explaining these determinants led to the conclusion that the most important factor influencing RPP voting is the fear that immigration undermines a nation’s culture.” (Andrea’s response paper)
 - “only one variable is significantly linked with RPP support in all five countries: people’s fear that immigrants undermine the country’s culture,” and cultural explanations work better than economic explanations in general

Empirical evidence

- Main conclusions from the multivariate analysis (p. 365):
 - “A comprehensive statistical analysis involving the interpretation of different models explaining these determinants led to the conclusion that the most important factor influencing RPP voting is the fear that immigration undermines a nation’s culture.” (Andrea’s response paper)
 - “only one variable is significantly linked with RPP support in all five countries: people’s fear that immigrants undermine the country’s culture,” and cultural explanations work better than economic explanations in general
 - In Switzerland and Austria, alienation doesn’t have any effect but it is very important in the other countries, **why??**

Empirical evidence

- Main conclusions from the multivariate analysis (p. 365):
 - “A comprehensive statistical analysis involving the interpretation of different models explaining these determinants led to the conclusion that the most important factor influencing RPP voting is the fear that immigration undermines a nation’s culture.” (Andrea’s response paper)
 - “only one variable is significantly linked with RPP support in all five countries: people’s fear that immigrants undermine the country’s culture,” and cultural explanations work better than economic explanations in general
 - In Switzerland and Austria, alienation doesn’t have any effect but it is very important in the other countries, **why??**
 - “It is noteworthy that these determinants of RPP support do not entirely pick up the class effect.” **What does this mean?**

Empirical evidence

- Main conclusions from the multivariate analysis (p. 365):
 - “A comprehensive statistical analysis involving the interpretation of different models explaining these determinants led to the conclusion that the most important factor influencing RPP voting is the fear that immigration undermines a nation’s culture.” (Andrea’s response paper)
 - “only one variable is significantly linked with RPP support in all five countries: people’s fear that immigrants undermine the country’s culture,” and cultural explanations work better than economic explanations in general
 - In Switzerland and Austria, alienation doesn’t have any effect but it is very important in the other countries, **why??**
 - “It is noteworthy that these determinants of RPP support do not entirely pick up the class effect.” **What does this mean?**
 - Conclusion: “voters’ attitudes make a much bigger explanatory contribution than their socio-demographic characteristics”

Empirical evidence

- Cross-country differences:

Empirical evidence

- Cross-country differences:
 - ① Switzerland and Austria

Empirical evidence

- Cross-country differences:
 - ① Switzerland and Austria
 - ② Belgium, France and Norway

Conclusion & debate

- Five class categories and two types of voting classes:

More recent findings

- Five class categories and two types of voting classes:
 - ① Preserve classes: sociocultural professionals for the left and large employers and managers for the centre-right

More recent findings

- Five class categories and two types of voting classes:
 - ① Preserve classes: sociocultural professionals for the left and large employers and managers for the centre-right
 - ② Contested strongholds: small business owners for the centre-right and the PRR and working-class for the left and the PRR

More recent findings

- Five class categories and two types of voting classes:
 - ① Preserve classes: sociocultural professionals for the left and large employers and managers for the centre-right
 - ② Contested strongholds: small business owners for the centre-right and the PRR and working-class for the left and the PRR
- Conclusion: “Old patterns are structured by an economic conflict: Production workers vote for the left and small business owners for the centre-right based on their economic attitudes. In contrast, new patterns are linked to the rise of the radical right and structured by a cultural conflict”
